Extract, Saponified Cedar Oil

DO AS WILD
ANIMALS DO!

Wild Arctic Foxes know instinctively what herbs and berries to seek out to make their coats vibrant and beautiful. From observing them, we selected herbs and berries to care for your pet.

«Whitening» controlled
organic shampoo

for helping to keep white coated
animals looking snow-white.

We use wild harvested and
organic ingredients:

Polar Cloudberry

is a favorite delicacy of the arctic fox. Cloudberry ripen in September. At this time the arctic fox's coat begins to change colour and as winter arrives it becomes completely white.

Organic acids and vitamin C contained in the cloudberry reduce the production of melanin, so the coat becomes snow-white, fresh and shiny. It is also capable of withstanding temperatures of minus 50 degrees!

Arctic Snow Cladonia

is a lichen with a high usnic acid content, which gives extra protection against harsh environmental stresses, cleanse away dirt and restores the natural bright white colour of the coat.

Saponified Cedar Oil

is a detergent base of natural origin that provides delicate and safe cleansing.
